

Welcome to the DaSiamRPNWithOfflineTraining wiki!

## Table of contents

- Supervised or Unsupervised Learning
  - Semi-supervised
    - class labels
  - Semi-supervised learning
    - unlabeled data
    - Transductive learning
    - Inductive learning
    - Why semi-supervised learning
  - Unsupervised learning
    - Generative Model
      - Clustering & Dimension Reduction (□□□□)
      - Generation (□□□□)
      - Principle Component Analysis (PCA)
    - Why Unsupervised Learning
    - math of Generative Models
      - Maximum likelihood
      - Variational methods
      - High dimensional spaces and the manifold hypothesis
      - PCA
      - Gaussian MM
    - Unconditional models
    - Conditional models
    - VAE
      - why vae
      - Conditional VAE
      - Problems of VAE
    - GAN
      - architecture
        - GAN - Discriminator
        - GAN - Generator
      - kernel
        - optimize difficult
        - GAN□Jensen-Shannon□□
      - zoo
        - LSGAN
        - wGAN /wGAN-gp
        - cGAN/cycleGAN
        - StarGAN
      - tutorial
